

Note to Editor

The manuscript (AOS2101-054) titled ‘Manifold Fitting by Ridge Estimation: A Subspace-Constrained Approach’ was submitted to AOS. The screening referee gave a brief report along with several issues concerning the manuscript.

My coauthor and I carefully read the report, and we decide to clear out several misunderstanding points in the report. We have attached the rebuttal letter providing a point-to-point response to the his/her comments. Our response has been based on the factual and technical parts only.

We believe our current paper matches AOS standard and we hope you may give us the opportunity of a new submission for review. Thank you very much!
